

ENVINERGY, RANKED AMONG THE « CHAMPIONS OF GROWTH » TOP 500 FOR THE 3RD YEAR IN A ROW !

French business-oriented newspaper Les Echos released on February 5th their latest "Champions of Growth 2021" leaderboard ("Les Champions de la Croissance"). Les Echos gave to this edition a special significance by stating that *France is indeed becoming a "start-up nation"*. Out of a list gathering the 10 000 companies with the highest growth in terms of annual revenue, several criteria had to be respected. Most of all, the turnover growth must be organically driven on the 2016-2020 period, the company must be independent, and headquartered in France.

Envinergy makes its way in the Top 500 of the leaderboard for the 3rd year in a row. *"This distinction among Les Echos' ranking once again makes us proud. We exhibit an 80% growth over the 2016-2019 period, comforting us in the roll-out of the missions we have been developing over the last years. We reiterate our sincere gratitude to all our clients and partners for their trust, and we congratulate our teams for all the work accomplished. Our expertise in financing, M&A and asset valuation in the 3 fields of wind, solar and hydro energy proves to be strengthened by the technical added value that we bring to the execution of our mandates. We are working at the heart of the energetic transition, and we strive to develop in promising new technologies shortly"*, Nicolas Picard and Eric Reisse (Managing Directors at Envinergy) declared. Earlier this year, the company had already published a few key figures on their 2020 performance, with an average of one financing or M&A deal closed per week, and a total 220 assets handled throughout the year.
